

Quality Principles and Policies

Quality Principles

At Stella Chemifa Corporation, as a leading manufacturer of fluorine compound products, we pursue to deliver ultimate quality with best technologies available and manufacture products which provide our customers with confidence and satisfaction not only in electronics but also in the innovative fields of medical science and clean energy, in order to promote public health and convenience and progress of the industrial society supporting them.

Quality Policies

1. Every member of the Company makes efforts toward sustainable improvements and greater customer satisfaction with strong determination.
2. We comply with applicable laws and regulations concerning products and services and observe our stakeholders' requests that we have accepted to observe.
3. We set specific objectives and goals for each of the above-mentioned items to continuously carry out the improvement activities and also review those activities through internal environmental audits, in order to improve our quality and productivity.
4. We clarify roles, responsibilities, and authorities by establishing the quality management organization and the operating system to advance our quality activities, while maintaining the latest quality management system.
5. We familiarize all our employees with these policies and disclose the policies to the public.
